

PROTECTED ACIDIFIER FOR ANIMAL FEEDING

DESCRIPTION

Mixed microgranules white-cream (acid) and cream microgranules (aromatics and flavors), with characteristic odor.

COMPOSITION

(E 296) D,L-Malic Acid	20 %
(E 297) Fumaric Acid	25 %
Aromatic and flavor substances mixture	
Matriz of lipid compound of vegetable origin	

APPLICATION METHOD

ACITEC – A GR is a protected product to obtain a slow cession. As the digestion of the lipid matriz takes place, the liberation of the Malic and Fumaric acids is produced, that contribute to the intestinal tract acidification.

ACITEC – A GR is used to obtain a constant and safe acidification through the complet intestinal tract, avoiding the hyperacidification and extending the action of the acids.

The special formulation, from vegetable fat and developed to protect the components of the acidifier, improve their liberation and their enteric action.

DOSE

Broilers	0.3 - 0.7 kg/tonne feedstuff
Starter	0.3 kg/tonne feedstuff
Finisher	0.2 - 0.25 kg/tonne feedstuff
Laying hen	0.5 - 1 kg/tonne feedstuff
Turkey: Starter	0.4 kg/tonne feedstuff
Finisher	0.3 - 0.25 kg/tonne feedstuff
Duck	0.3 - 0.4 kg/tonne feedstuff

PRESENTATION

Paper sachs of 25 kg net, with interior sach of plastic.

STORAGE

To preserve in a dry fresh place with low than 40°C.
To keep it well closed.

The date limit of guarantee of the product is 18 months after the manufacture date.
